

## FGM, Inc. awarded DoD Data Strategy, Metadata Registry Management and Data Services Integration contract

Press Release

FGM WILL CONTINUE TO SUPPORT DOD IN THE DEVELOPMENT, REFINEMENT, AND INTEGRATION OF NCES METADATA SERVICES.

RESTON, VA – April 22, 2009 – FGM announced today that it has received the follow-on contract to continue to support NCES and the DISA Data Services Office by designing, developing, and maintaining NCES Metadata Services. FGM's support will include the maintenance and enhancement of existing services, the development of new services, integration of existing services, and facilitating the implementation of the DoD Net-Centric Data and Services Strategies by Communities of Interest (COIs) and Programs of Record using NCES capabilities. FGM will continue to provide both technical and subject-matter expertise to facilitate data and information sharing and reuse across the DoD.

The goal of NCES is to enable the secure, agile, robust, dependable, interoperable data-sharing environment for DoD where warfighter, business, and intelligence users share knowledge on a global network environment that ensures information superiority, and improves mission effectiveness by shortening the decision cycle.

FGM will continue to advocate improvements and refine capabilities to better enable the realization of the DoD Net-Centric Data and Services Strategies on the Global Information Grid (GIG) and will remain deeply involved in the process to transform DoD information systems from platform-centric to network-centric orientation in support of the DoD net-centric warfare concept.

FGM's President and CEO, Scott Gessay, said: "Our subject matter expertise and our SOA experience allow us to provide a consistently high level of service in the information sharing arena. We are pleased that our customers continue to appreciate the high quality services and value that FGM provides."

### About FGM

Founded in 1987, FGM is an industry leader in providing innovative information technology (IT) services for the Federal government. FGM is headquartered in Reston, Virginia, with offices in Suffolk, Virginia; San Antonio, Texas; Omaha, Nebraska; Honolulu, Hawaii; Colorado Springs, Colorado; and San Diego, California. They specialize in software and systems development and integration, including Service Oriented Architecture (SOA) environments.
